NAIL KNIFE GRINDING MACHINE

Product Detail:

Power Consumption	1 kw
Brand	KM-7
Material	Steel
Weight	350 kg
Capacity	100 Kg/Saat
Material of Construction	Steel

Wire Nail Grinding Machine:

Your machine will become dull after a while and will require re-grinding. We have developed a special Cutter Grinder to grind all cutter profiles. These machines are equipped with special types of apparatus and apparatus so that even a semi-skilled worker can easily grind (re-sharpen) cutting tools after a short training. Re-sharpening takes only a few minutes. This three-wheel type Cutter Shredder is available in 300mm wheel size.

NAIL POLISHING MACHINE

Product Detail:

Capacity	500 Kg
Power consumption	4 KW
Function	Nail Cleaning
MATERIAL	Metal
Brand	KM-8
Voltage	380 V
SPEED	960 RPM
Electric	3 Phase

We are engaged in offering a wide range of Polishing Barrels that are widely used for polishing nails. Basically, nails polished with this barrel are produced using a wire nail making machine. Nails designed due to this nail pulling process show dullness. At times, large varieties of these nails also rust due to damp or wet weather conditions. In this way, the nails produced in order to offer superior quality nails to our valued customers are polished with a lacquer sleeve, giving a bright and sparkling appearance.
